Cooperation Problems: Wolves and Sheep

Decide *silently* if you’re a wolf or a sheep.

On the count of three, hold out a fist if you’re a wolf, or an open hand if you’re a sheep.

Keep your hands out! Count the number of wolves and sheep in the group.
Cooperation Problems: Wolves and Sheep

If the group is mostly WOLVES, “Lean Pack!”
- Get 2 points if you’re a wolf
- Get 0 points if you’re a sheep

If the group is mostly SHEEP, “Predator Feast!”
- Get 5 points if you’re a wolf
- Get 3 points if you’re a sheep

Keep track of your points! (Take some tokens)

**WINTER IS COMING!** Will your ecosystem survive?

Add all the points you’ve earned together.

If you have less than $\text{[number of players x 10]}$ points, everyone freezes to death.

If you have more than or equal to $\text{[number of players x 10]}$ points, the two players with the most points survive.
