Transporting Equipment

Grad 1st Yr Fall Equipment
(MOS)
Grad 1st Yr Fall Equipment

EQUIPMENT BINS

In The Bins:

- Camera Kit
- Zeiss Prime Kit
- 3x3 Sachtler Tripod w/ Plate
- Baby Legs
- Hi-Hat
- Skateboard Dolly w/ Handle
- 13’ PVC Track
- 4 Sandbags
- 4 Apple Boxes
- Light and Fire Kit
- 702T Recorder Kit
- Blue Line Modular Mic Kit
- Shotgun Mic Kit
- Sound Accessory Kit
- 300 Series Boom Pole
- 4 Sound Blankets

Attention!

Be aware, you may only be allowed 2 bins to use to transport your equipment from the check-out rooms to your vehicles.

Tip:

If your camera kit is on wheels, wheel them down instead using precious bin space.
Sandbags should be used to keep bins from moving while on curb. Make sure to put one sandbag on front wheel, and one on back. This should be done before any equipment is taken out of the bins.

Tip:
When upstairs in the Production Center, try to load sandbags at the top of the bins, so that they easy to reach.

FINDING AN SUV

Any full size SUV will be able to handle the 1st year MOS equipment allotment.

Treat any SUV like you would a location you were loading equipment in or out to avoid cleaning fees.

Take pictures before and after you load in and out, note any damage, and make sure you don’t leave any dirt or debris in the vehicle.

FINDING AN SUV

SUV Checklist
SUVs that should handle 1st year MOS package should have:

1. The ability to put their back seats down.
2. The ability to use the trunk and still have space for one passenger and one person in backseat.

Tip:
Keep your bins on the sidewalk, but close to vehicle. This will make it easier to pass off equipment to your crew to pack.

By putting the backseat down you have created another two feet of space for you to safely and efficiently pack your equipment.
Keep Your Equipment Compact!

Keep your equipment as compact as possible when loading onto the sidewalk. It'll help you keep an eye on it, and make it easier to hand off to those packing the vehicle.
Grad 1st Yr Fall Equipment

**CREW & FIREWATCH**

**Crew**
Ideally your crew would consist of 3-4 people, which will make not only make your check-out/ins go more smoothly, but also your load ins/outs.

**Firewatch**
Bring enough crew members to help load in addition to the driver, and including someone to watch the equipment!

**TIP:**
Sort your equipment so that you can pack heaviest, flattest first. One crew member can pack SUV, the rest sort and hand equipment. Keep equipment compact on sidewalk. It’s courteous to others on sidewalk, and helps you keep a better eye on equipment.

PACKING THE SUV

TIPS/Reminders

- Have two people holding heavy things at all times
- Put the heaviest and flattest items in first!
- Sound blankets are easy to pack on top and can be used for extra padding if needed
- 3-4 crew members is ideal

PACKING THE SUV

More TIPS/Reminders

- Make sure you are finding safe and secure places when packing the SUV.
- Sandbags are helpful for keeping things secure, but use in conjunction with sash cords and/or ratchets.
- Safely close the SUV trunk when done packing. If packed correctly, you won’t have any issues.
TIP:
If you have ordered the right size vehicle, there should be space in the SUV for you and another passenger. Have a great shoot!
