Question: My drill to detail doesn't work! It used to open up in a separate tab.

Answer: Disable your pop-up blocker.

1. When you choose “Detail” from a blue hyperlink, a pop-up window may prevent the new tab from opening.

   ![Image of pop-up blocker]

   In Google Chrome, the pop-up blocker will appear at the right side of the address bar. Click it to open.

2. Go to the upper right hand corner, and there should be an options button that appears.

   ![Image of options button]

3. Click on “Allow pop-ups for udwplus.nyu.edu”.

   ![Image of pop-up settings]

4. You may then receive the below message in the new window, but simply close the new window and drill into the detail from the original page again.

   The analysis cannot be performed because it contains no columns.
