Provides an overview of the Grottes de la Queyrerie including geographic coordinates, topographic maps, and a brief description of each cave. The system is composed of two upper grottes and three lower grottes. Only the third lower grotte shows evidences of occupation in the form of troglodytic modifications. The issue also mentions the trou, grotte, diaclace, and diaclace-grotte de la Torgnole, of which the latter shows evidence of troglodytic modifications.
