Requesting a New Account

Prerequisite

First, you need a working NetID (NYU Home Page).

The Account Management Site

Account generation, renewal and approval are all done in the NYU High Performance Computing (HPC) account management site, IdentityIQ (IIQ), https://iiq.home.nyu.edu/identityiq. Use your NetID to log in.

Submit a New Account Request

The following content is from High Performance Computing in New York: Requesting an HPC account with IIQ

1. Open your browser.
3. Log in with your NetID and password.
4. When you log in to IIQ, you will see a screen like the image below. Click “Request/Renew HPC Account”. To enlarge the image, click it.

5. You should see a form like this. Notice the Select Faculty Sponsor drop-down list. The selected person will need to approve your request as instructed below. If you are not a full-time NYU faculty member, you will need an NYU faculty member to sponsor your application. This is probably your thesis supervisor, or NYU collaborator.

6. Hit submit, and the request will go to your sponsor to approve (if applicable), and your account will be created, usually within a day of being approved. You will be returned to the dashboard, and now you should see your request in the “Pending Approvals” tables, as shown below:
7. Finally, ask your sponsor to approve with the instructions here: Approving Account Request
