Course Evaluations

The UDW+ Course Evaluations Dashboard allows you to access course evaluations data for specific terms, classes, and instructors.

Specifically, you can access:

- Course Evaluation Survey results (relative to the user’s course & semester data access).
- Survey completion data sourced from University's SIS Albert system, where evaluations results data is stored
- Evaluation results that include student responses to:
  - 7 Standard, University-Wide questions; and
  - Evaluation question sets (as determined by individual school/department).

The Course Evaluations Dashboard is comprised of 8 distinct dashboard pages:

- **Standard**: Presents results for the 7 established Standard, University-Wide evaluation questions
- **School-Course & Instructor**: Presents response averages and response rate distributions for each school’s course and instructor-specific questions
- **All Comments**: Displays all open-ended school, course, and instructor comments
- **All Responses**: Full listing of all responses, as filtered; all available for export
- **Stats and Comments**: Presents supplementary metrics per instructor and class, including: enrollment total; number of responses; response rate; response average; median, mode & standard deviation response rates; open-ended responses
- **Averages and Comments**: Presents supplementary metrics per instructor and class, including: enrollment total; number of responses; averages of responses for the class; open-ended responses
- **Class/Instructor Comparison**: Displays response averages of all 5-point questions, as per selected filters for: the 7 established University-Wide questions; and, averages for 5-point course and instructor-specific questions
- **Instructor Comparative**: Demo / Work-in-progress page. Presents rolled-up response-averages to selected 5-point University-Wide questions and Instructor (or a selected group of instructors) questions – as compared to their school, department, subject and location.

11 prompt filters allow for the narrowing of results across all dashboard pages. Selected prompts are retained across all dashboard pages, each dashboard page is enabled with a standard set of filters:

- Term
- Evaluation Type (mid-term, final)
- Academic Group (school)
- Academic Organization (department)
- Instructor Name
- Class Number
- Combined Class Number
- Class Title
- NYU Class
- Subject
- Location

For some Schools, there is a large amount of data related to Course Evaluation comments, which may result in a potential crash or lapse of data results while using the dashboard. In order to avoid a lapse or crash, users must select an option(s) under the 'Academic Organization' prompt on the following tabs: All Comments; All Responses; Stats and Comments; Averages and Comments.

Important notes about the data:

- Course Evaluation data is sourced from the University's SIS Albert system where evaluations are taken by students per class. Data are refreshed daily from Albert.
- Partial Course Evaluation data results are available in the Dashboard 24 hours after the evaluation period has opened, while complete data will be made available 24 hours after the period closes.
- By default, data will display for the most recent term that has completed an evaluation period. Once data becomes available for a new term, the default term will be adjusted upon the user’s first login.
- All evaluation data is de-identified to ensure the anonymity of students.
- Administrators in Global Programs will have access via UDW+ to full course evaluation data for classes offered at all Global Academic Centers, and Site Directors will have access (also via UDW+) to this level of detail only for classes at their site.
- School representatives determine:
  - Which classes will be evaluated each term, and
  - Define evaluation periods.

<th>Summary of Changes</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Version</th>
<th>Date</th>
<th>Description</th>
</tr>
</thead>
</table>
| 1.4, 1.5, 1.6 | February 2017 | **Change:** The 7 'University-Wide' questions are now referred to as 'Standard Questions'; first dashboard tab updated to 'Standard'; relevant analysis filters and chart titles/labels have been updated to reflect 'Standard' question set.  
**Enhancements:** New filter prompt added to all Dashboard Pages: Combined Class Number; 4 new columns added to Class/Instructor Comparison report: Location, Enrollment total, Number of Responses, and Response Rate. |
| 1.3      | December 2016 | **Enhancement:** Response columns expanded for two Pages: Stats & Comments and Averages & Comments.  
**Enhancement:** Location headers added to reports on the following Pages: All Comments, All Responses, Stats & Comments and Averages & Comments.  
**Other:** "Demo" label & work in progress language added to Instructor Comparative Page. |
| 1.1, 1.2 | November 2016 | **New Dashboard Page:** Class/Instructor Comparison.  
**Enhancement:** Two new filter prompts added to all Dashboard Pages: Subject & Location.  
**Enhancement:** Additional view selectors added to two pages: 1) can toggle between viewing Stats (only) vs. viewing Stats AND Comments; 2) can toggle between viewing Averages (only) vs. viewing Averages AND Comments |
| 1.0      | October 2016  | **Release to Production** |
