snippet - Bulk approval of HPC account requests

If you are teaching a class which will use HPC, you can pre-approve a list of students for HPC accounts. The students can then request an account in the normal way, but you will not need to log in and approve each request individually.

To prepare bulk approval:

1. Log into the NYU Identity Management service (IIQ) and click the “Bulk HPC Account Request” link on your dashboard:

![Dashboard screenshot]

2. You will be taken to a screen like the image below. Enter yourself as the faculty sponsor, a comma-separated list of the netids of the students in your class in the second field, and the other fields as indicated:

![Request NYU High Performance Computing Accounts]

3. Hit “Submit”. Your students can now request an account and it will be automatically provisioned within a few hours of their request, with no further input required from you.

4. If you have any difficulties or questions, contact us at hpc@nyu.edu for assistance.
