UDW+ Retention Dashboard

Purpose

UDW+ Retention Dashboard was designed to provide Office of Institutional Research and the Student Reporting Community with the ability to analyze a cohort (a group of students), who enter NYU at a specific point in time, using different demographic, social, academic (including academic program) and other attributes. Cohort analysis is used to understand the characteristics of students entering at a specific time as well as for predictive modeling and student success measurements.

Who should use this dashboard?

Office of Institutional Research / Student Reporting Community
