<tr>
<td>S01. Budget and Balance Summary and Detail</td>
<td>For funds 20, 21, 22- IT D drill does not match summary amount.</td>
<td>In Progress</td>
<td>Drill down shows only the amount for the accounting period you have selected, while summary shows ITD amount. Summary takes into account the amount at the fiscal year opening period and then adds the accounting period you are selecting in the report. When you select 'All Other Funds', it only takes the value for the accounting period you have selected, so the drill down and summary match.</td>

Personnel encumbrances are overstated.

Change in Funds Report does not return all revenue balances.

Revenue that is categorized as New Revenue Account (which means it has not been categorized yet) is excluded.

"YTD Encumbrance" only brings back encumbrance for OTPS, therefore "YTD Balance" field is not taking into account "YTD Encumbrance WD".

Annual Projected Amount is overstated by approximately one extra payment for some 51104 employees.

Personnel encumbrances are missing or understated.

Additional Salary Reporting: Pay Period Amount displays $0.00 when actual is a negative.

Budget Control Detail report OTPS encumbrances are incorrect.

"Fall 2017" is unavailable as an option for Term.

My ad hoc reports don't work and they worked before the upgrade.

UDW+ retrieves Student Data from Winter 2010 onwards.

The UDW+ team is looking into retrieving more data.
| NYU Financials | Purchase Orders with Multiple future fiscal years, are being encumbered in the current fiscal year only. For example A Purchase can be setup for $1000 dollars with 10 lines on the PO Line 1 specifies $100.00 to be processed in FY17 current fiscal year. Line 2 specifies $500.00 to be processed in FY18 future fiscal year. A voucher is created for line 1 which is then processed in FY17 This is correct. A voucher is created for line 2 which is then processed in FY17. This is incorrect and should of been processed in FY18 which creates an encumbrance in UDW+ because it should of populated budget FY18 and not FY17 in Fame. Workaround A fix by the FSM team was put in place to correct vouchers that are created in i-buy to populate the correct budget years related to the PO lines in Fame. This issue is in Fame contact Finance Link to correct this issue. | NYU Financials | Purchase Orders that include the shipping and handling charge, but when a voucher is created the shipping or handling charge is direct charged, which then keeps the Purchase Order Open in i-Buy and shows an encumbrance balance in UDW+ Workaround The Client needs to submit a change order to close out the PO in i-Buy which will release the encumbrance shown in UDW+. This a business process issue by A/P. |
