If you are teaching a class which will use HPC, you can pre-approve a list of students for HPC accounts.

To prepare bulk approval, click the “Bulk HPC Account Request” link on your dashboard (Tip: your dashboard is the screen you see after logging in to IIQ):

You will be taken to a screen like the image below. Enter yourself as the faculty sponsor, the NetIds of the students in your class in the second field (comma separated with no spaces), and the other fields as indicated.

**Entering Student NetIds**

Please Note: The student NetIds must be **separated by comma with No spaces**.

If you have all your students' NetIds in a file, named 'file1', with one student NetId per line, such as:

```
Desktop$ cat file1
sg4573
tg1553
ph990
mh3429
zh854
ij405
ikj211
srj292
maj407
sj2171
caj382
sk6407
ako274
apk337
```

you can easily convert it to a comma separated list of netIds (and no spaces) if you run the following command in a Mac OS X or Linux terminal:

```
Desktop$ paste -d, -s file1
sg4573,tg1553,ph990,mh3429,zh854,ij405,ikj211,srj292,maj407,sj2171,caj382,sk6407,ako274,apk337
```

You can copy-and-paste the output of the above command in the appropriate text field.
Finally, hit "Submit".

If you have any difficulties or questions, please contact us at hpc@nyu.edu.
