Create Space Button Macro

The Create Space Button Macro renders a create space icon that links to the 'create space' page. The icon appears as rendered below.

Screenshot: The Create Space Button in Confluence

⚠️ To display this icon, you require 'Create Space' permission which is assigned by a [site administrator] from the [Administration Console]. See [Security] or contact your site administrator for more information.

On this page:
- Usage with the Macro Browser
- Usage with the Wiki Markup Editor
- Parameters
- Example: Specify the size of the icon displayed

Usage with the Macro Browser

To insert the create space button macro into a page using the Macro Browser,

1. Open the Confluence page or blog post that you want to edit, then click the ‘Edit’ button.
2. Click the Macro Browser icon on the toolbar. The macro browser window will open.
3. Scroll through the list of macros to find the one you want. Alternatively, start typing the macro name into the search box at the top right of the macro browser. Macros with a matching name will appear in the main pane.
4. Click the desired macro.
5. Set the macro parameters to your requirements. If desired, you can preview these changes by clicking ‘Refresh’.
6. Click ‘Insert’ to add the macro onto the page.

✓ You can also insert macros via autocomplete. For more information, see Using Autocomplete in the Rich Text Editor.

Once you’ve found the create space button macro, click ‘Insert’ to add it to your page.

Usage with the Wiki Markup Editor

<table>
<thead>
<tr>
<th>What you need to type</th>
<th>What you will get</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unknown macro: {nomarkup}</td>
<td>![Create Space Button Icon]</td>
</tr>
</tbody>
</table>

Parameters

Parameters are options that you can include in Confluence macros to control the content or format of the macro output. The table below lists relevant parameters for this macro.

Parameter names are different in the macro browser and in wiki markup. Below we show the macro browser parameter names in **bold** text, and the equivalent wiki markup parameters in *(bracketed)* text. If we do not show any parameter name for the wiki markup, then you should leave out the parameter name and simply include the parameter value as the first parameter, immediately after the colon (:)．

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Default</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Icon Size</strong> <em>(size)</em></td>
<td>large</td>
<td>Specify whether to use small or large icon.</td>
</tr>
<tr>
<td><strong>height</strong></td>
<td>natural size of icon <em>(1:1 pixel ratio)</em></td>
<td>Stretches or shrinks the height of the icon to the number of pixels specified.</td>
</tr>
<tr>
<td><strong>width</strong></td>
<td>natural size of icon <em>(1:1 pixel ratio)</em></td>
<td>Stretches or shrinks the width of the icon to the number of pixels specified.</td>
</tr>
</tbody>
</table>

Example: Specify the size of the icon displayed
<table>
<thead>
<tr>
<th>What you need to type</th>
<th>What you will get</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unknown macro: {nomarkup}</td>
<td></td>
</tr>
</tbody>
</table>
