Grant Expense Comparison

This page displays grant expense categorized by the principal investigator and the principal investigator's department.

The total expenditure included in this analysis matches the “Grants by Department Administrators page in the Departmental Metrics Dashboard with the Principal Investigators view selected. It differs from reporting that classifies grants by the administering department instead of the department of the principal investigator.

- Only grants whose principal investigator is in Steinhardt are included.
- All the grants of Steinhardt faculty are included, whether or not the grant is administered within Steinhardt.
- Grants administered in Steinhardt for principal investigators from outside the school are not included.

Data for the current and prior three fiscal years are provided. By default expense in the four years is aggregated. One or more years may be selected instead.

Detail on individual grants is provided by drilling on the expense numbers.

By default the summary and detail pages are sorted by expense. The data may be sorted in other ways with the arrows available by hovering over the column headings.
