SpeleoDordogne 85(4)

Final part of article on longest cave systems in the Périgord.

**Journiac**

mentions the Grotte de Journiac, which is approximately 1000 m long. Provides a brief history of the cave’s exploration, including the damage to the primary entrance by quarry work.

**Proissans**

brief note on propection of the dry valley that descends to le Borne-Cent-Vingt. Underneath the château a cluzeau or possibly modified cave was noted but could not be explored.
