Valojoulx

Provides an overview of the Grottes de la Queyrerie including geographic coordinates, topographic maps, and a brief description of each cave. The system is composed of two upper grottes and three lower grottes. Only the third lower grotte shows evidences of occupation in the form of trogloodytic modifications. The issue also mentions the trou, grotte, diaclase, and diaclase-grotte de la Torgnirole, of which the latter shows evidence of trogloodytic modifications.
