IXe Congrès livret-guide de l'excursion

Book presents an overview to the caves and rock shelters of Aquitaine and Charente that have prehistoric and protohistoric remains. The book opens with a general overview of the geology of the Aquitaine basin, and then presents an overview of each site. Individual site reports are written by different authors and includes an overview of location, excavation history, stratigraphy, finds, and chronology.

Savignac-de-Miremont

Section on La Ferrassie written by H. Delporte. The author briefly describes the various caves and rockshelters that make up the site as well as summarizes the major findings of Peyrony's excavations between 1892-1922. Provides a detailed description of the stratigraphic levels found at the site.
