One Year Retention Rate

General Information

This page exhibits retention rate for First Time Full Time (FTFT) students from year one to year two.

This dashboard automatically runs for the past 6 complete Cohort Terms of Entry that can be analyzed for freshmen retention from year one to year two. By default it is only looking at Washington Square. Abu Dhabi and Shanghai can be added through interaction with the Cohort School prompt. It is also ONLY looking at the population of freshmen that have a status of 'Enrolled'. If a student is not enrolled in a subsequent semester, for example if they are on a leave of absence, they are not counted in the retention population. However, if that student returns in a later Fall semester they will be counted in the retention population for that semester.

- One year Freshmen Retention looks at the entire university (prior to the user implementing any filters)
- International vs Domestic Freshmen Retention: compares the freshmen one year retention rate for International vs Domestic Freshmen
- Domestic Freshmen Retention by Ethnicity: Compares the retention rate for freshmen by IPEDS Ethnicities, or by a grouping of ethnicities that indicate 'under represented minorities'

This page is run for First Time Full Time Entry Cohort = Y

- This cohort designation is specific to the IPEDS Graduation Rate Survey (GRS)
- This attribute tracks and aggregates students that entered in either (a) the fall as first-time full-time freshmen or (b) in the summer (part-time or full-time first-time freshmen) and re-enrolled in the fall as full-time students
- Only applies to undergraduate freshman students

Data Sources

Data is sourced from UDW+ and is built using SIS - Retention and SIS - Retention Summary Subject Areas.

Data Notes:

The IPEDS retention rate, in the dashboard, may differ by less than 10 students total on any given year. This is due to the following:

1) Retention Model captures information for students that were ever part of any 'New', New-Continuing Type.
2) Academic Load in the Retention Subject areas is calculated based on the number of units attempted. (>=12 units: Full Time)

Dashboard Prompt Filters

One Year Retention Rate page is intended to be run with a minimal number of filters.

The following dashboard filters are available for further refining the results:

<table>
<thead>
<tr>
<th>Filter</th>
<th>Location</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cohort School</td>
<td>main filters</td>
<td>By default, does not include Abu Dhabi or Shanghai.</td>
</tr>
<tr>
<td>TOE Legal Sex</td>
<td>more search options</td>
<td>Legal Sex of the Student at the Term of Entry.</td>
</tr>
<tr>
<td>TOE IPEDS Ethnicity</td>
<td>more search options</td>
<td></td>
</tr>
<tr>
<td>TOE Citizenship Status</td>
<td>more search options</td>
<td></td>
</tr>
</tbody>
</table>
