**Sites**

Number of Sites:

1. **Roman road**
   - passes through Journiac from Le Bugue to near Périgueux
     - Historie de Périgord 42
     - passes near Bragut, then la Ganne, and southern part of Journiac at Garrijou, Zénière; no archaeological evidence

2. **Sepulchre**
   - M. Lassere found it approx. 100 m from bourg while building foundations of a farm, 2 m deep, dated to XIIe s.

3. **Le Bos**
   - 12 March 1997; wooded summit that dominates the smaller river of Journiac; Chevillot met with property owner in April 1999; dépôt of Bronze ax heads: 64 total; most came to surface with implementation of a fence (no archaeological control); currently in the Musée des Eyzies; along an axis of communication between the larger valleys of the Périgord?; prospection of surface only recovered flint nuclei that could be attributed to Neolithic or Bronze-Copper Age; 2 flanged of the type Thonac-Vanxains; 62 of heel type (53 of type Centre Ouest, 4 of Haquenau, 3 of Orléans, 1 of Breton, and 1 of Normand); Middle Bronze Age; several types of ax heads; 27 kg of Bronze; identified as utilitarian deposit; attributable to the older part of the Middle Bronze Age between the 15th-14th c. BC; in the Périgord the Middle Bronze Age marked by the commonality of Bronze and the production of large numbers of objects

4. **la Plantade**
   - place name that may indicate location of former megalith; oriented NW
   - 1965 clearing with plow uncovered walls over 30 acres, mortar, and tegulae; near the house paving found at shallow depth and a trench with ironstone walls

5. **Grotte du Roussil**
   - halfway up valley near the road that leads up to Roussil; property owner already commenced de-obstruction; leads to a gallery of about a dozen meters and then an area of unstable rock fall; several worked pieces of silex found in the déblais
     - mentioned in inventory
     - X=333,70; Y=4982,60; owner M. Lalot; trou cleared

6. **Grotte des Claques**
   - X=485,69; Y=3297,48; close to Grotte de Journiac; discovery of a human cranial fragment
     - Spéléo 1994 (2)

7. **Aux Martoulets**
   - sarcohpagus found in 1965; contained a silver ring

8. **Grotte des Fages n.1**
   - X=488,55; Y=3296,40; Z=130; small manmade banquette

9. **Grotte des Fages n.2**
   - X=488,58; Y=3296,48; Z=130; evidence of recent clearing; awkward outline of two animals in clay

**Karstic Features**
1. **Grotte du Roussil**
2. **Grotte des Claques**
3. **Grotte des Fages n.1**
4. **Grotte des Fages n.2**
5. **Grotte sous la Fage**
   
   X=488.50; Y=3296.47; Z=155 m; 12 m long with several unexplored cavities; old well of dry stone near road, largely in ruins; n. 217 -5
   
   Spéléo 1998

6. **Grotte du Vignal**
   
   dowsing along entranche
   
   mentioned in inventory
   
   exploration around Vignol in 1964 to find cave previously described; several columns found leading to potential galleries (5); number 5, along an old road, was of special interest
   
   also mentions aven du Vignal; mentioned in inventory

7. **Grotte des Fages n.3**
   
   near cavity 2 (what is relation to Grotte sous la Fage?)

8. **Trou de blaireau**
   
   X=485,53; Y=3296,42; needs clearing; warm air

9. **Source de Péchorel**
   
   X=483,89; Y=3297,72; water source leads into rock (possible to enter when dry)
   
   part of prospection of 2 different sources of water; X=483,90; Y=3297,73

10. **Grotte de la carrière de Journiac**
   
   same as grotte de Journiac? (verify)

11. **Grotte du Bragut**
   
   topography and photos taken; cleared with bulldozer; X=483,60; Y=297,15, Z=210; topographic map
   
   clearing work on March 24, 1979
   
   mentioned in inventory

12. **Grotte de Journiac**
   
   topographic map done August 3 1981 by Letourneiur and Seranne
   
   partial deobstruction August 5 1979
   
   repaired entrance that had disappeared due to exploitation of quarry at the entrance; second attempt to find entrance but without result
   
   accessed by artifical tunnel; parts of cave affected by smoke from quarry machines?
   
   mentions Old Journiac, New and a third?
   
   1979 work on N710 road cleared a new opening to the cave, cave had previously been closed 22 years because of quarry work
   
   mentioned in inventory
   
   X=485,55; Y=298,50; ~1000 m long
   
   active stream; 1953 700 m of new unexplored galleries uncovered; door installed in new entrance discovered by road construction; key with Spéléos; divided into Old Journiac and New Journiac sections
   
   Spéléo 71(2)
   
   X=485,53; Y=3296, 42; owned by M. Lassere; two entrances
   
   current entrance at 150 m; previous at 330m in 1950
   
   mentioned in inventory
work in 1969 to find a new entrance unfruitful; 3 cavities explored but did not lead into grotte

X=485.55; Y=3298.50; Z=190; 930 m of topography recorded

13. sinkhole at Joinies

in a wooded area; approximately 50 m; property owner M. Nadal

14. Perte du Bos

X=485, Y=295.5; Property owner M. Garrigue; n. 217 -1; M. Garrigue did de-obstruction with bull dozer; 4 m deep

15. Lalot

X=484, Y=298.5; small river
