Site Administrators and their Permissions

All site administrative functions are performed from the Administration Console. You need to have System Administrator or Confluence Administrator permissions to access the Administration Console.

The Confluence permission scheme allows the following levels of administrator permissions:

- **Super-User** – full administrative access to Confluence, plus visibility to all the content.
- **System Administrator** – full administrative access to Confluence.
- **Confluence Administrator** – access to most of the Confluence administrative functions.

Please refer to the overview of global permissions in the Administrator's Guide for full details.
