Moving a Page from one Space to Another

You can easily move pages from one space to another within Confluence.

To move a page, you require 'Create Pages' permission which is assigned by a space administrator from the Space Administration screens. See Space permissions or contact a space administrator for more information.

To move a page to a new space, you need to edit the page's location — refer to the instructions on moving a page.

Note

Any links to the page from the current space will automatically be renamed to point to the page in the new space.
