User Status List Macro

The **User Status List** macro displays a history of any Confluence user’s Status Updates on your Confluence page or blog. This is the same history that appears in the user’s **Status Updates view**.

*Screenshot: Example Usage of the User Status List Macro*

<table>
<thead>
<tr>
<th>History of my Status Updates</th>
</tr>
</thead>
<tbody>
<tr>
<td>“Working on final User Profile updates.”</td>
</tr>
</tbody>
</table>

| “Moving onto Networks.” | Delete | May 06 |
| “Well… Just one last status update.” | Delete | May 01 |
| “Now venturing off onto other topics.” | Delete | April 30 |
| “Now working on User Status Updates. At last…” | Delete | April 30 |

- Usage with the Macro Browser
- Usage with the Wiki Markup Editor
- Parameters

**Usage with the Macro Browser**

To insert the User Status List macro into a page using the Macro Browser,

1. Open the Confluence page or blog post that you want to edit, then click the ‘**Edit**’ button.
2. Click the Macro Browser icon on the toolbar. The macro browser window will open.
3. Scroll through the list of macros to find the one you want. Alternatively, start typing the macro name into the search box at the top right of the macro browser. Macros with a matching name will appear in the main pane.
4. Click the desired macro.
5. Set the macro parameters to your requirements. If desired, you can preview these changes by clicking ‘**Refresh**’.
6. Click ‘**Insert**’ to add the macro onto the page.

![You can also insert macros via autocomplete. For more information, see Using Autocomplete in the Rich Text Editor.](image)

Once you’ve found the User Status List macro and have added the required parameter values, click ‘**insert**’ to add it to your page.

**Usage with the Wiki Markup Editor**

<table>
<thead>
<tr>
<th>What you need to type</th>

Parameters

Parameters are options that you can include in Confluence macros to control the content or format of the macro output. The table below lists relevant parameters for this macro.

Parameter names are different in the macro browser and in wiki markup. Below we show the macro browser parameter names in **bold** text, and the equivalent wiki markup parameters in *(bracketed)* text. If we do not show any parameter name for the wiki markup, then you should leave out the parameter name and simply include the parameter value as the first parameter, immediately after the colon (:).

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Required in Wiki Markup?</th>
<th>Default</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Username</td>
<td>yes</td>
<td>none</td>
<td>The username of the Confluence user whose history of Status Updates you wish to show.</td>
</tr>
</tbody>
</table>

If you wish to list status updates made by more than just one user, you can use the *recently updated* macro in conjunction with the following parameter-value combinations:

- **Include these Content Types Only** — *status*
- **Author(s) by username** — the user(s) whose status updates you want to include in the list. If you leave this field blank, the status updates of all users will be included.
