Recently Used Labels Macro

The **recently used labels** macro renders a list of the most recently used labels in a specified scope (Global/Space/Personal).

**On this page:**
- Usage with the Macro Browser
- Usage with the Wiki Markup Editor
- Parameters

**Usage with the Macro Browser**

To insert the recently used labels macro into a page using the Macro Browser,

1. Open the Confluence page or blog post that you want to edit, then click the 'Edit' button.
2. Click the Macro Browser icon on the toolbar. The macro browser window will open.
3. Scroll through the list of macros to find the one you want. Alternatively, start typing the macro name into the search box at the top right of the macro browser. Macros with a matching name will appear in the main pane.
4. Click the desired macro.
5. Set the macro parameters to your requirements. If desired, you can preview these changes by clicking 'Refresh'.
6. Click 'Insert' to add the macro onto the page.

You can also insert macros via autocomplete. For more information, see Using Autocomplete in the Rich Text Editor.

Once you've found the recently used labels macro, click 'Insert' to add it to your page.

**Usage with the Wiki Markup Editor**

<table>
<thead>
<tr>
<th>What you need to type</th>
<th>What you will get</th>
</tr>
</thead>
<tbody>
<tr>
<td>(recently-used-labels)</td>
<td>nyush, literature, file-list, orders, vacuum, decisions, kb-how-to-article, design, learning, electronics</td>
</tr>
</tbody>
</table>

**Parameters**

Parameters are options that you can include in Confluence macros to control the content or format of the macro output. The table below lists relevant parameters for this macro.

Parameter names are different in the macro browser and in wiki markup. Below we show the macro browser parameter names in **bold** text, and the equivalent wiki markup parameters in (*bracketed*) text. If we do not show any parameter name for the wiki markup, then you should leave out the parameter name and simply include the parameter value as the first parameter, immediately after the colon (:).

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Required?</th>
<th>Default</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Number of Labels to Display</strong> (count)</td>
<td>no</td>
<td>10</td>
</tr>
<tr>
<td><strong>Scope for Retrieving Labels</strong> (scope)</td>
<td>no</td>
<td>global</td>
</tr>
<tr>
<td><strong>List Style</strong> (style)</td>
<td>no</td>
<td>list</td>
</tr>
<tr>
<td><strong>Title</strong> (title)</td>
<td>no</td>
<td>none</td>
</tr>
</tbody>
</table>

Specifies the total number of labels to display in the list.

Specifies the scope of labels to be displayed in the list. Valid values include:

- global — covers all non-personal spaces in the Confluence installation.
- space — the current space.
- personal — your own personal space.

Displays the list of recently used labels in a horizontal 'list' style or in a 'table' style. The table style includes additional information such as the page to which the label was added user who added it.

Adds a title to the top of the list in table style. Titles are only visible when the **List Style** (style) parameter has been set to *table*.
