Attachment Versions

When viewing a list of attachments, a new version of an existing attachment can be added simply by uploading an attachment with the same filename on the attachment view. Click the blue arrow next to an attachment to display previous versions of the attachment.

Existing files will be kept with the name ‘Version x’, where the value of ‘x’ increments with each upload of an attachment with the same filename.

Some additional notes:

- You cannot remove specific versions of an attachment — if you remove an attachment, all versions will be removed as well. (See feature request CONF-3079.)
- You cannot revert to a previous version of an attachment. (See feature request CONF-1943.)
- By default, attachments and their versions are stored in the <confluence_home>/attachments directory. (See Attachment Storage Configuration in the Administrator's Guide.) There is no limit to the number of attachments/versions, provided that there is enough disk space.
