P2 - Home School PLAN information and a complete plan listing for the students in them

OVERVIEW

This report uses the Term Registration Subject Area.

It results in a list of a school’s plans and a list of all the students who are associated with each plan. The student information that is included is the students’ basic contact and demographic information (address, phone, email, gender, etc.), other general student information (enrollment status, degree checkout status etc.), and information related to ALL programs/plans (academic career, program, plan, etc.) that the student is associated with.

Plans roll up to Reporting Department. Reporting Departments roll up to Reporting School and Reporting School Group. Whenever an analysis is based on the ‘owner’ of a plan, filters should be applies using the ‘Reporting Department’ or ‘Reporting School’ or ‘Reporting School Group’.

BUSINESS PURPOSES

Use this report to:

- Get a list of all students (from your school or another division) who are registered in one of your school’s plans/subplans. This is a convenient means of reporting on your school’s minors or secondary majors.
- Examine declared majors and minors of students associated with a department. (e.g. “where do chemistry majors tend to double major”, Biology or Spanish?)
- To view the Expected Graduation Term, Completion Term or Career Admit Term for the students in your plans.

NOTE:

Summed metrics should NOT be created based on this data since the same metrics may be repeated on each line causing inflated summations.

Expected Grad Term and Degree Checkout Status are available in this file.
