A Note About the Recent Wiki Upgrades

The NYU Wikis Service Team is extremely excited about the recent upgrades to NYU Wikis. NYU Wikis is now powered by Atlassian's Confluence 4.2.4, the enterprise wiki.

**New features include the following:**

- Quick Find and Replace
- Page Layouts
- Labels on Attachments
- Space Attachments Macro
- Better Table Editing

The upgrade also ditched wiki markup completely and unified the Rich Text Editor and Wiki Markup Editors. For users who still love wiki markup, we have the following guides to help you transition to the new editor:

- A “before and after” guide for people who use wiki markup: What’s Changed for Wiki Markup Users.
- A “before and after” guide for people who have always used the rich text editor: What’s Changed for Users of the Old Rich Text Editor.

As always we value your feedback and welcome comments, questions or concerns by calling the IT Service Desk at 212-998-3333 or by sending an email to askits@nyu.edu. Furthermore, documentation can be found in the Wikis Help Guide.
