Viewing Children of a Page

Confluence displays the children of a page, if any exist, in one of two views configured globally by a site administrator:

**Show**: In this view, a list of the page’s children is displayed as links at the bottom of the page. Clicking on a link will take you to the corresponding child page.

**Hide**: In this view, the list of the page’s children is hidden when you view the page. A link at the bottom of the page tells you how many children the page has. Clicking on this link will display the list of its children.

Screenshot above: Hide children

Notes

- Confluence defaults to the ‘Show’ or ‘Hide’ children view based on your preference from your last visit to the site.
- To hide the list of children, click on ‘Hide Children’.
- To view the location of the page in the space’s hierarchy, click on ‘View in hierarchy’.
- To add a new child page, click on ‘Add Child Page’.
