Getting started

Here are some tips to get you started. You can edit this page to see how it works!

1. Create a page
   - Click "Create" and select "Blank Page" to create your first page.
   - New pages are created as children of the page you are currently viewing.

2. Add to your page
   - Click "Edit" to enter the Confluence editor and use the page layouts feature to structure your content using sections and columns.
   - Use headings to format your text and drag and drop images into your page to provide visual interest.
   - Click "Insert" and select "Other Macros" to add macros for navigation, special formatting and other media.

3. Organise your pages
   Here are some tips for organising your content.
   - Change the page order
     The sidebar on the left displays your pages in a hierarchy. If you have Space Administrator permissions you can click "Space Tools" > "Reorder Pages" to move pages around.
   - Add labels
     Labels help keep pages organised and make it easier for you to find the information you need. Click "Labels" at the bottom of a page to add or edit. The "Related pages" section on this page uses labels too!
   - Make templates
     Standardise and speed up the page creation process with templates. You can create and format a template with page layouts, standard headings and instructional text for hints and guidelines. Check out our sample page on "Making a template"
