Space Permissions Overview

Every space has its own independent set of permissions.

Space permissions can only be granted by a space administrator. A space administrator has permission to do anything in the space regardless of any other setting.

Permissions can be assigned to any group, to any individual user in the Confluence-User group, and to users in the Anonymous group.

These are the different permissions that can be assigned at the space level:

- **View**: user can view this space’s content, including the space’s details, and its pages and news items (blog posts)
- **Pages**:
  - Create – user may create and edit pages in this space.
  - Export – user may export pages in this space.
  - Restrict – user may apply page-level restrictions.
  - Remove – user may remove pages in this space.
- **Blog**:
  - Create – user may add and edit blog posts in this space.
  - Remove – user may remove blog posts in this space.
- **Comments**:
  - Create – user may make comments in this space.
  - Remove – user may remove comments from this space.
- **Attachments**:
  - Create – user may add attachments in this space.
  - Remove – user may remove attachments from this space.
- **Mail**:
  - Remove – user may delete individual mail items.
- **Space**:
  - Export – user may export content from this space.
  - Admin – user has administrative permissions over this space.

**Warning**

If you deny all administrative access to a space by mistake, so that nobody has access to administer the space any more, you will need to ask someone in the confluence-administrators group to fix the permissions for you.
