Global Reports Macro

The Global Reports Macro renders a list of links to global reports.

This includes a list of all orphaned pages in the site, a list of all undefined links in the site and RSS feeds for new pages and blog posts.

The global reports macro appears as shown in the screenshot below.

Screenshot: The Global Reports Macro in Confluence

Global Reports

- New or updated pages since your last login.
- Find all pages that aren't linked from anywhere.
- Find all undefined pages.
- Feed for new pages and blogs.

On this page:

- Usage with the Macro Browser
- Usage with the Wiki Markup Editor
- Global Reports
- Global Reports Parameters
- Examples

Usage with the Macro Browser

To insert the global reports macro into a page using the Macro Browser,

1. Open the Confluence page or blog post that you want to edit, then click the 'Edit' button.
2. Click the Macro Browser icon on the toolbar. The macro browser window will open.
3. Scroll through the list of macros to find the one you want. Alternatively, start typing the macro name into the search box at the top right of the macro browser. Macros with a matching name will appear in the main pane.
4. Click the desired macro.
5. Set the macro parameters to your requirements. If desired, you can preview these changes by clicking 'Refresh'.
6. Click 'Insert' to add the macro onto the page.

You can also insert macros via autocomplete. For more information, see Using Autocomplete in the Rich Text Editor.

Once you've found the global reports macro, click 'Insert' to add it to your page.

Usage with the Wiki Markup Editor

<table>
<thead>
<tr>
<th>What you need to type</th>
<th>What you will get</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unknown macro: {nomarkup}</td>
<td>Global Reports</td>
</tr>
<tr>
<td>New or updated pages since your last login.</td>
<td>Feed for new pages and blogs.</td>
</tr>
<tr>
<td>Find all pages that aren't linked from anywhere.</td>
<td></td>
</tr>
<tr>
<td>Find all undefined pages.</td>
<td></td>
</tr>
</tbody>
</table>

Parameters

Parameters are options that you can include in Confluence macros to control the content or format of the macro output. The table below lists relevant parameters for this macro.

Parameter names are different in the macro browser and in wiki markup. Below we show the macro browser parameter names in **bold** text, and the equivalent wiki markup parameters in *bracketed* text. If we do not show any parameter name for the wiki markup, then you should leave out the parameter name and simply include the parameter value as the first parameter, immediately after the colon (:).

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Default</th>
<th>Description</th>
</tr>
</thead>
</table>
| Width of Table  
(width)  | 99%  |
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Specifies the width of the table in which the links are displayed.</td>
<td></td>
</tr>
</tbody>
</table>

**Examples**

Specify the width of the table in which the links are displayed

```
{global-reports : width=50%}
```

By default, the table width is set to 99%.
