  - Brooklyn (OpenStack)
  - Dalma (NYU Abu Dhabi)
- Transferring data to/from the clusters
- Transferring data to/from Prince cluster using Globus
- Submitting jobs with sbatch
- Available software
Before you start
To copy data between your workstation and the NYU HPC clusters, you must set up and start an SSH tunnel on the workstation. We have instructions for this for Windows, Mac and Linux workstations.
This page is retained from an earlier version of the HPC wiki only for reference, and the equivalent up-to-date page is at How to copy files from / to the HPC clusters.
