How to copy files to and from the HPC clusters

Copying Files To/From Prince
This page is being updated to reflect copying files to/from the new cluster Prince.
Before you start

To copy data between your workstation and the NYU HPC clusters, you must set up and start an SSH tunnel on the workstation. We have instructions for this for Windows, Mac and Linux workstations.
This page is retained from an earlier version of the HPC wiki only for reference, and the equivalent up-to-date page is at How to copy files from / to the HPC clusters.
