

# Linking to Personal Spaces and User Profiles

This page tells you how to add a link to a user's personal space or user profile from within another Confluence page, using the [Wiki Markup editor](#).

You can link to a user's personal space (or user profile) easily if you know their username.

**To link to a user's personal space,**

What you need to type	What you will get
<div style="border: 1px solid orange; border-radius: 5px; padding: 2px; display: inline-block;">Unknown macro: {nomarkup}</div> [~username]	[~username]

If the user does not have a personal space, then the link will go to their user profile.
