

Viewing Space Activity

Note that the space activity information is **disabled by default**. See notes [below](#).

If enabled, the space activity screen displays statistics on the activity in each space. These include:

- How many pages and blog posts have been viewed, added or updated over a given period.
- Which content is the most popular (most frequently viewed).
- Which content is the most active (most frequently edited).
- Which people are the most active contributors/editors of content.

To view the activity in a space:

1. Go to the **'Browse Space'** view. There are two ways to browse a space:
 - Go to a page in the space and select the option you want from the **'Browse'** menu. The corresponding tab of the 'Browse Space' view will open.
 - Or click the  icon next to the space name on the [Dashboard](#). The 'Pages' tab of the 'Browse Space' view will open.
2. Go to the **'Activity'** tab.

Confluence will show a graphic display of the number of pages and blog posts that have been viewed, added and edited, showing trends over a period of time. For example:

Activity for week starting 31 December 2006

Period: [month](#) | **[week](#)** | [day](#) Week: [<< Previous](#) | [Now](#) | [Next >>](#)

See also: [Global Confluence activity](#)

Viewing

This graph shows how many times pages and news posts have been viewed over the current time period.

Screenshot 1: Number of viewed pages and blog posts in a week

The top ten most popular and most active pages and/or blog posts will be listed, with a link to each.

Most popular content (Views)

1.  [Confluence Documentation Home](#) (2262)
2.  [Set JAVA_HOME variable in Windows](#) (1180)
3.  [Confluence Installation Guide](#) (687)
4.  [Remote API Specification](#) (467)
5.  [User Macros](#) (436)
6.  [Installing Confluence Standalone](#) (385)
7.  [JIRA Issues Macro](#) (370)
8.  [Administrators Guide](#) (353)
9.  [Dynamic Tasklist Macro](#) (335)
10.  [Frequently Asked Questions](#) (320)

Notes

- The [Confluence Usage Stats plugin](#), which provides the 'Space Activity' screen, is known to cause performance problems on large installations. This plugin is **disabled by default**. A status report on the progress of the performance issues with this plugin is available in this issue: [USGTRK-15](#).
- Your Confluence system administrator can enable the plugin, but please be aware of the possible impact upon your site's performance.
- The plugin is sometimes called 'Confluence Usage Tracking'.
- If your Confluence site is [clustered](#), the space activity information will not be available.
