

Adding a Photo to a Page

Please note: when you edit a page your cursor defaults to the beginning of the [Return to Conference Home Page](#) link. To avoid breaking the link, click on another part of the page.

To add a photo click on **Edit** in the upper-right corner of the page. Click on the part of the wiki page where you want to **place the photo**. The edit menu includes an **image icon**, click on this and **Browse** for the image on your computer.

Click **Attach** and when the file name appears you may select an **Alignment** (none, left, center, center or right.)

Finish by clicking **OK**, then **Save** in upper right corner of the page. You should now be able to see the photo on your page.
