

Creating a New Panelist

Creating a New Panelist

To create a panelist, navigate to the Panel page and go to the **Add** button in the upper right corner of the page, then click **Page**.

Change the title at the top of the page to the name of the panelist. This should be a unique name. Start each name with a number, or a letter to set the sequence of the panelists in the navigation.

Finally, add a label at the bottom called **panel \underline{Z} subnav**, the number \underline{Z} representing the number panel. For example if this is a panelist for the 5th panel, the label would be **panel $\underline{5}$ subnav**.

ALL LABELS THAT CONTAIN THE WORD 'NAV' SHOULD BE PREFIXED WITH THE WIKI CONFERENCE CODE. SEE EXISTING PAGES FOR EXAMPLES. (ex: an_panel7subnav for the Arabian Nights Navigation)
