

Office Connector Prerequisites for Display

Unknown macro: {hide}

The entire content of this page is included into other pages via the {include} macro.

If you want to make use of the [View File macro](#) or to [view Office files](#) attached to a wiki page, you need the setup described below.

Browsers and Flash Player

You can use any browser to view an Office file on a wiki page or attachment view, provided that you have installed [Adobe Flash Player](#) version 9 or later. You do not need to have an Office desktop application installed on your computer, in order to view Office files in Confluence.

File Types

To be displayed in Confluence, the file needs to be a valid Microsoft Office 97-2007-compatible or PDF file, of the following types:

- .doc and .docx
- .xls and .xlsx
- .ppt and .pptx
- .pdf

Unknown macro: {hide}

If you are using OpenOffice to create and edit the documents, you will need to save your document in Microsoft Office 97-2003 format before attaching it to a Confluence page.
