Space Permissions Overview

Every space has its own independent set of permissions.

Space permissions can only be granted by a space administrator. A space administrator has permission to do anything in the space regardless of any other setting.

Permissions can be assigned to any group, to any individual user in the Confluence-User group, and to users in the Anonymous group.

These are the different permissions that can be assigned at the space level:

- **View:** user can view this space's content, including the space's details, and its pages and news items (blog posts)
- **Pages:**
  - Create: user may create and edit pages in this space.
  - Export: user may export pages in this space.
  - Restrict: user may apply page-level restrictions.
  - Remove: user may remove pages in this space.
- **Blog:**
  - Create: user may add and edit blog posts in this space.
  - Remove: user may remove blog posts in this space.
- **Comments:**
  - Create: user may make comments in this space.
  - Remove: user may remove comments from this space.
- **Attachments:**
  - Create: user may add attachments in this space.
  - Remove: user may remove attachments from this space.
- **Mail:**
  - Remove: user may delete individual mail items.
- **Space:**
  - Export: user may export content from this space.
  - Admin: user has administrative permissions over this space.

**Warning**

If you deny all administrative access to a space by mistake, so that nobody has access to administer the space any more, you will need to ask someone in the **confluence-administrators group** to fix the permissions for you.
