

# Creating a New Panelist

## Creating a New Panelist

To create a panelist, navigate to the Panel page and go to the **Add** button in the upper right corner of the page, then click **Page**.

Change the title at the top of the page to the name of the panelist. This should be a unique name. Start each name with a number, or a letter to set the sequence of the panelists in the navigation.

Finally, add a label at the bottom called **panel $\underline{Z}$ subnav**, the number  $\underline{Z}$  representing the number panel. For example if this is a panelist for the 5th panel, the label would be **panel $\underline{5}$ subnav**.

**ALL LABELS THAT CONTAIN THE WORD 'NAV' SHOULD BE PREFIXED WITH THE WIKI CONFERENCE CODE. SEE EXISTING PAGES FOR EXAMPLES.** (ex: an\_panel7subnav for the Arabian Nights Navigation)
