**Viewing User Profile**

A Confluence User's **Profile** view shows details about that person and lists their recent activity. If you are viewing your own Profile view, you can also update your **profile picture** and **login password**. If you are viewing another user's Profile view, you can add them to your **Network** of users you are following and if they have set up a Personal Space, you can add this to your list of Favourites.

**To access your User Profile view,**

- Go to the 'Profile' view for your user profile. To do this:
  - Log in to Confluence, if you have not already done so.
  - Go to your name at the top of the page. (This is the 'User' menu. A dropdown list will appear when your cursor hovers over the 'User' menu.)
  - Select 'Profile' from the dropdown list. The 'Profile' view will open.

**Updating your Profile**

You can update the following aspects of your Profile from this view:

- **Information about yourself** - to modify these details, see **Editing User Profile**.
- **Your Profile picture** - to change your Profile picture or upload a new one, see **Choosing a Profile Picture**.
- **Your login password** - to change your login password, see **Changing Password**.

You can switch between your Profile, Profile picture update and login password update views by clicking the 'Details', 'Picture' and 'Password' links in the left-hand column, respectively.
